

You are now the owner of a USB wafer which contains the following files:

- » a total of 35 searchable PDF files, with bookmarks, containing all published issues of the original “The Present Age” (in the folder marked “PDF-Dateien”)
- » the newly created *Index* to all TPA issues (also as a searchable PDF file—“Index_Present Age.pdf”).

You can select, view and print all of these individually—and, if you wish, create a complete set to be kept in a ring binder.

In addition, there is an overall Index entitled “Gesamtindex.pdx”, which you can access and open (double-click) using the free Acrobat Reader software (for *Mac* or *Windows*).

Simply enter the desired search word (name or concept) into the appropriate Search window and you will be presented with the results taken from all issues.
